

WEEKLY BULLETIN Friday 26 May 2023

This Week's Treviglas Focus – Every minute counts.

1. A Message from the Headteacher

I frequently talk with both students and staff about every minute counting. We know we must make every minute of our lessons count, and our classroom routines help us with this. For example, the routine that we use to get silent attention is: 3, 2, 1, focus. This brings our students to attention rapidly, saving precious minutes.

Checking for understanding from the front of the classroom also helps us meet the challenge of ensuring every minute counts. Our 3,2,1 focus routine makes a point of showing to students that you are ready to notice their feedback about their understanding. Ask questions all the time and have these ready: predict the likely mistakes and address them head on. This is an efficient way to check for understanding and rapidly provide opportunities to support those students who need it.

These straightforward strategies contribute to making sure every minute counts.

2. Mrs Drake – Teaching and Learning

Over the past two weeks, it is clear that staff are beginning to embed the learning routines in their lessons. However, it is important that we think about the purpose of the routines in terms of how they support teaching and learning, rather than thinking about the phrases in isolation.

The routine that we use to get silent attention is: 3, 2, 1, focus. It is vital that *every* student is silent and focusing on the board, before the teacher begins the explanation. Whilst you will need silent attention at different parts of the lesson, it should always be used before the 'me' part of the modelling section. When the teacher has the focus of all students, they should live model how to complete the task, step by step, showing the students how to organise messy thinking into a clear method, using a visualiser to do this. It is only after this live modelling, with direct instructional teaching, that students will then be able to move onto completing the task/applying the learning with the teacher in the 'we' section and then practising this independently in the 'you'. Consequently, this links back to the importance of the routines: all students need to be silent and looking at the board to understand the learning; after students have had an opportunity to practise the learning independently, we must check understanding and adapt our teaching accordingly.

3. Mrs Suttle – English

Our year 11 'Night Before the Exam' whole year group revision sessions have been going incredibly well and students were thrilled and confident with their first literature exam. We continue to offer last minute revision sessions over half term on Tuesday, Thursday and Friday to revisit language paper 1 and 2.

To help support students who are consistently struggling to follow our classroom behaviour expectations, we use our English subject report. Students report to TTL after every English lesson and will be either praised or sanctioned there and then. It really works and turns into a really positive interaction. If anyone would like to talk to me about how this works please do get in touch. Paula Suttle TTL English.

4. Miss Quarton – Humanities

Year 8 History students are currently completing a study of the reasons behind British Women gaining the vote in 1918. Our students have been incredibly interested in the processes that sparked the women's movements that we now know as the Suffragists and Suffragettes. Our Year 8 historians also investigated the role of the Great War 1914-1918 in proving women's equal role in British Society and in obtaining the vote. The extracts, from some of the student's work, demonstrate the high level of understanding which has been achieved and our students ability to write high level historical argument.

5. Mr Wells – Sport

Treviglas Academy have been hosting the Newquay Schools gifted and talented testing days, this half term, all the primary schools were invited to bring their best team players, to work on their components of fitness and be tested by Treviglas sports leaders.

The components the primary students tested, were aerobic endurance, flexibility, power, muscular endurance and strength. This was completed using testing equipment and normative data which is designed for the athletes age group.

We also gave the athletes the ability to test their speed and coordination in different tests based around basketball. It was great to see so many like minded sports people trying their best to get the top scores. We hope this will be the first of many sessions where the young sportspeople develop their ability and understanding of their bodies and how to develop them in their chosen sport or sports.

eXtra@ programme

Please take a look at our eXtra' Programme and thank you to all staff that contribute to it. Do share these opportunities with our students. Tutors should look out for those students who they feel will benefit from attending an aspect of this programme and support them to find out how to do this.

If you are unable to open the link from this Bulletin please go to the Treviglas website where you will find the information under the "Personal Development" tab.
